

We pride ourselves on providing our patients with the best possible standard of care. **Because of this, we now perform the optomap® retinal scan on all of our patients during the annual eye examination.** The optomap will allow our doctors to capture an image of the back of your eye where potential vision threatening diseases can be found. This includes **diabetes, glaucoma, certain types of cancer, retinal tears, and cardiovascular issues.**

When the optomap is performed you will not need to be dilated unless the doctor states otherwise.

As part of your pre-test work up, we will capture optomap® images for review with the doctors during your examination today. **This is a \$35 co-pay with your vision insurance.** Any questions you have about the optomap® Retinal Exam can be directed to doctor when they review the images with you during your exam.
